

# TRUSTED DRIVER

## The New E-Citation Solution

### Innovative Software, Easy Accessibility

Trusted Driver's innovative E-citation platform encompasses one federated search and features cutting edge voice-to-text technology, lightning-fast data returns and self-populating e-forms. This all-in-one web-based program is accessible through government cloud services.

### Advanced QR Code Technology

Trusted Driver's simple and easy-to-use QR code citation system immediately uploads to the government cloud and eliminates the need for external hardware. No more troubleshooting handheld devices or printers! No more paper tickets! No more citation uploads at the end of shift!

### Dynamic Data = Actionable Results

Take a deeper dive into your agency's traffic enforcement data using Trusted Driver's powerful, real-time analytics tool. Maximize your department's ability to identify traffic enforcement trends and turn them into actionable results. Optionally, customize a public-facing dashboard to show milestones reached and goals in progress.

## Flexible Options for Law Enforcement

Trusted Driver offers the following optional services:

- Send urgent safety alerts to geographical locations within your community;
- Issue warnings or positive feedback to drivers;
- Deliver e-vouchers to help drivers repair vehicle equipment;
- Allow drivers to self-report medical, physical and mental health conditions.

\*Note: E-citation does not require use of optional services.

# Revolutionize E-Citation With

**TRUSTED**  
DRIVER

## Improved Situational Awareness

Officer safety is our top priority. Our E-citation platform was designed to perform without devices that can cause distractions, such as handheld devices or printers. With Trusted Driver, officers stay alert and aware of their surroundings when it matters most.

## Race & Ethnicity Data Collection

In accordance with Texas state law, Trusted Driver's E-citation platform captures race and ethnicity data during each traffic stop, including GPS-accurate incident locations, resulting in a generated report that meets state-mandated requirements.

## Increased Productivity, Better Value

With Trusted Driver, law enforcement organizations enjoy:

- Access to our web-based platform in every in-car computer, making it a valuable force multiplier;
- A superior real-time data dashboard and robust analytics tool with downstream investigative benefits for the entire law enforcement organization;
- Lower costs compared to other services which charge for external hardware or software upgrades.
